TECHNOLOGY CLARITY ASSESSMENT

Know what is working. See where you are exposed. Get a practical plan for what comes next.

For CEOs facing a consequential technology decision — whether scaling operations, modernizing aging systems, integrating an acquisition, or addressing growing technology risk.

UNDERSTAND
Get an independent, executive-level read on what's working in your technology — and what isn't.

PRIORITIZE
See the risks and opportunities that matter most, ranked by business impact.

ACT
Leave with a clear Now / Next / Later roadmap and practical next steps.

The Six-Point Technology Framework

01
Technology Strategy & Business Alignment
Is technology actually aligned with where the business is going?

02
Technology Leadership & Organizational Fit
Do your core systems support the business, or slow it down?

03
Risk Exposure & Resilience
Where is the business actually exposed, and how resilient is it?

04
Vendor Strategy & Ownership
Who owns what, and are the right vendors in place?

05
Technology Investment & Value
Is technology spend producing real business value?

06
AI & Automation Opportunity
Where could AI meaningfully improve the business?

What you receive

- Six-Point Scorecard across six areas
- Priority risks and opportunities
- 30–90 day quick wins
- Now / Next / Later roadmap
- Technology investment guidance
- Scheduled executive findings session with practical recommendations
- *Built on a pre-assessment questionnaire, document review, and a 90-minute executive discovery session*

90-minute executive discussion

3. Assess
Independent scoring + analysis

4. Findings Session
Executive recommendations + roadmap

FIXED FEE
$5,000
Starting at, + travel

TYPICAL TIMELINE
7–14 days
Independent review to findings session

BEST FIT
Growing, technology-dependent businesses
Facing important technology or leadership decisions

Experienced Leadership. Practical Transformation.

I bring three decades of technology and executive leadership across consulting, software, and SaaS — including leading the consolidation of five acquired products into one AI-powered platform in 12 months as SVP of Technology at LifeSpeak, a publicly traded wellness SaaS company, and 18 years as a fractional CIO, proof that fractional leadership done well is a long-term relationship, not a stopgap.

Beyond the Assessment

Clarity is the starting point. When you're ready to execute, I can provide ongoing Fractional CTO leadership — On-Demand executive guidance or Embedded, hands-on ownership — to turn your roadmap into results, without the commitment of a full-time hire.
